

GENDER PAY GAP REPORT 2022

THE CLUB COMPANY

The Gender Pay Gap is a measure of the difference in the average pay of men and women across the whole business, regardless of the work they do and the role they hold.

It is different to Equal Pay which is about men and women receiving the same pay for doing the same job.

The figures in this report cover every single one of our employees in our clubs and everyone in our Central Support team.

For the pay reporting we have used the data for everyone working for us on full pay on the snapshot date of 5th April 2022. For bonus reporting, the data covers anything paid from 6th April 2021 to 5th April 2022.

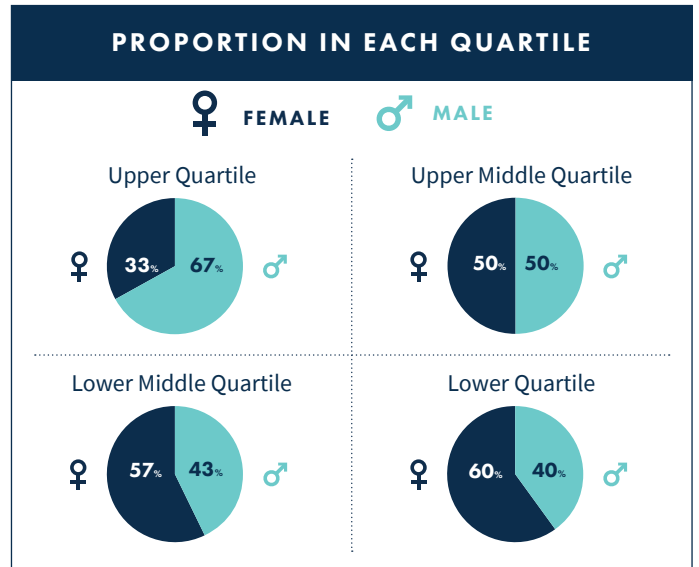

PAY AND BONUS GAP		
Difference between men and women		
	Mean (Average)	Median (Average)
Gender Pay Gap	20.3%	0.62%
Gender Bonus	8.5%	50.4%

The UK's average mean gender pay gap in favour of men is 14.9% in 2022, down slightly from 2021. The average median gender pay gap for full time workers is 8.3%, up slightly from 7.7% last year.

The overall gender pay gap for our business is 20.3%, up from 15.2% in 2021. Our data tells us that this is driven primarily because we have more men than women in our senior and executive roles.

We are concerned that this gap exists and is higher than the UK average, however, we are fully committed to reducing it and remain passionate about improving the gender split across all layers of our organisation and in particular supporting and enabling more women to move into more senior leadership roles with us.

Our median pay gap is significantly lower than the UK average at 0.62%, down from 7% last year and this is thought to be the most representative measure as it ignores extremes of higher earners at executive and senior management level.

The Club Company Group value inclusion and strive for equality for every team member. We have a remarkable equal mix of 50% female and 50% male employees across our business and we are confident that our male and female employees are paid equally for equivalent roles.

I can confirm that our data has been calculated according to the requirements of the Equality Act 2010.
